Experience & Certifications

Entrepreneurship

Harvard Business School

A course from Harvard Business School teaching management, business modeling, communication, product development, marketing and overall skills regarding entrepreneurship. Certificate available upon request.

Inclusive technology development

Partnership with LightHouse in The Hague.

A year long creative process for developing an inclusive product for visually impaired children. This project was conducted with the aim of reducing educational gap between these children. Skills developed include: CAD, product development, collaboration, market research, and prototyping.

Assistant at Mechanical Engineering department

Shell

This internship was centered around inventory management, collaboration with engineers and improving efficiency in the workplace. I was tasked with organizing tools in ways that streamlined the processes of senior staff.
